

Beat Heart Pro

SKU: TESPOTBEATPROHRK

Bracelet to monitor your physical activity, heart rate and sleep patterns

At any age, physical activity is important, which is why SBS has dedicated its entire Go Life line to fitness.

With **Beat Heart Pro** you will have everything under control: your times, the number of steps you take, your heart rate, calories burned, distance travelled and even the quality of your sleep. In addition, the bracelet can also receive call or message notifications, and control music playback if required. With one touch of the screen, you will have all the functions at your disposal.

Even recharging is simple (which we recommend you do at least once a week). Simply connect the bracelet to a charger or PC port using the **micro-USB charging cable** included in the package.

To use Beat Heart Pro, you will need to download the free Go Life app that was developed by SBS. With the app installed, it will be easy to monitor your daily physical activity. The app is available for iOS (8.0 and later) on the [AppStore](#) and Android (version 4.3 and later) on [Google Play](#).

Features:

- Bluetooth V4.2
- LCD touch display
- Stand-by Time: 7 days
